PROJECT

STORE MANAGEMENT SYSTEM

Developed comprehensive solution for small business owners featuring real-time analytics dashboard, product listing with dynamic pricing & inventory control, sales analysis with daily tracking/revenue reports, and automated stock alerts. Integrated secure authentication with role-based permissions, bulk price updates, trend visualization, and customer-supplier management systems.

EDUMART - STUDENT MARKETPLACE

- Developed student-to-student marketplace for used items
- Built secure authentication with student verification
- Implemented product listing with favorites/wishlist
- Created real-time chat for buyer-seller communication
- Developed advanced filtering & search functionality
- Added "Today's Deals" section for recent listings
- Features: Image upload, reviews, ratings, meeting scheduling

WEB VULNERABILITY SCANNER

Developed automated security testing tool for detecting OWASP Top 10 vulnerabilities including SQLi, XSS, and CSRF. Implemented comprehensive scanning with site crawling, security headers analysis, and multi-threaded vulnerability detection. Created detailed PDF reports with severity ratings and remediation guidance using custom payload generators. Successfully identified 2000+ vulnerabilities with 95% accuracy and minimal false positives across multiple client applications.
